Power teaching and learning with Chromebooks and Chrome Education Upgrade

To help learners and educators thrive, schools need flexible devices that are simple to use and maintain, giving them the most value over time.

→

Chromebooks are powerfully simple devices purpose-built for education.

Many Chromebooks come bundled with Chrome Education Upgrade to give schools advanced security and management controls.

Unlock more value with Chromebooks and Chrome Education Upgrade

 chromebook

Operating System

ChromeOS is the modern and secure cloud-based operating system from Google that powers every Chromebook, ensuring they're ready for teaching and learning.

Device management

Chrome Education Upgrade is designed to help your IT team easily manage 10 or 10,000 Chromebooks. It enables admins to personalize settings and device policies through a simple cloud-based console. With management covered, teachers can focus on teaching and students on learning.

Get the most of out of your education technology

$ Cost effective

Chromebooks – the best-selling device in K-12 education worldwide – offer high value and longer lifespans for the cost, while Chrome Education Upgrade helps save IT staff time and associated costs.

Flexible

Chromebooks can be shared across students, subjects, and grade levels – helping students of all kinds learn key technical skills.
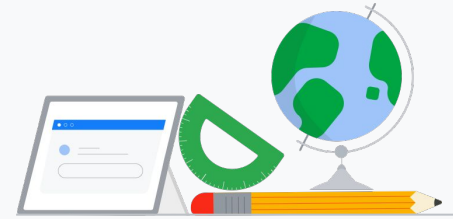

Secure

Chromebooks are secure out of the box with built-in protections like verified boot and automatic updates. Chrome Education Upgrade enhances these features with more control over device security.

Easy to manage

No matter how many Chromebooks you have in your school's fleet, Chrome Education Upgrade makes it easy to manage all of them from the central Google Admin console.

Made for everyday learning

→ Chromebooks come with Google for Education tools for everyday learning like Google Classroom, collaborative tools like Docs, Sheets, and Slides, and built-in apps that foster creativity like Screencast.

Did you know?

Early and consistent keyboarding practice can positively impact students' performance and test scores on computer-based assessments.[*]

Keep education going – even offline or with low connectivity

Students and teachers can continue teaching and learning using offline mode on their Chromebook:

→ Reading and writing emails in Gmail

→ Taking notes in Google Keep

→ Working in Google Docs, Sheets, and Drive

🌐 **chromebook**

Make the most of your budget with Chromebooks

57%

Schools can purchase, deploy, and operate Chromebooks at a 57% lower cost over three years.*

Chromebooks paired with Chrome Education Upgrade offer big benefits and savings for your school.

With Chrome Education Upgrade, IT admins can more easily manage devices with:

→ **More control**
Get greater control over all of your devices to help secure your learning environment with the ability to set up to 1,000 device policies.

→ **Enhanced security**
Apply advanced security settings and data protections to help safeguard your data and devices.

→ **Remote management capabilities**
Manage your entire fleet right from your Google Admin console – even on your mobile device from a remote location.

→ **Greater flexibility**
Use devices for testing with locked mode in Google Forms and kiosk mode on Chromebooks.

🕐 **Time-saving**
Chrome Education Upgrade lets you give your IT admins their valuable time back. ChromeOS devices deploy 76% faster than Windows devices.**

🔄 **Longer lifespans**
Chromebooks feature longer-than-average lifespans. Plus, they get 10 years of automatic updates to make them more secure.

🔧 **Durable construction**
Made to be durable for years of use and withstand the wear and tear of education, many Chromebooks feature spill-proof keyboards and scratch-resistant Gorilla® Glass.

Take your budget further with extra support for deployment and training

When you invest in **Chromebooks with Chrome Education Upgrade, Google Workspace for Education Plus,** or **ChromeOS Flex with Chrome Education Upgrade,** you may be eligible to receive these service offers at no cost:

✓ Chrome deployment
✓ Educator training
✓ Google Workspace deployment
✓ Data analytics

chromebook

Chromebooks are secure right out of the box

🔒 **No need to buy antivirus software**

Chromebooks come with built-in antivirus software, so no purchases from third-party security vendors are needed.

🛡️ **Receive 10 years of updates**

Chromebooks receive automatic updates for 10 years – more than any other operating system commits to today.

ZERO

There have been zero reported successful ransomware attacks on any ChromeOS device to date

ChromeOS is your best defense against ransomware

→ **Verified boot**

Upon startup, a Chromebook performs this self-check and will repair itself if it detects its system has been corrupted in any way.

→ **Security sandbox**

On your Chromebook, each web page and app runs in a restricted environment so if you land on a malicious page, your machine won't be affected.

→ **Automatic updates**

Chromebooks automatically manage their updates because the most effective way to protect against malware is to ensure all software is up to date.

→ **Automatic data encryption**

Chromebooks are 256-bit encrypted for every user, so everyone's space is unique, secure, and never accessible by another user.

chromebook

Deploy, manage, and secure your entire fleet with Chrome Education Upgrade

With Chrome Education Upgrade, you're providing IT admins with an easy way to deploy, manage, and secure hundreds – even thousands – of devices.

Power

Chrome Education Upgrade offers a variety of powerful controls like zero-touch deployment, streamlined app license management, and more.

Simplicity

With Chrome Education Upgrade, all of your controls are in one place – Google Admin console. Admins can even manage devices right from their phones.

Scale

With the click of a button, you can send out controlled updates or provision access to an app across many devices.

Did you know? The Google for Education services offer can help you get the most out of device policies and setup support.

→ **Protection for missing devices with Chrome Education Upgrade**

If a Chromebook is lost or stolen, give admins the ability to remotely lock or wipe devices. They can even display a personalized message on the Chromebook.
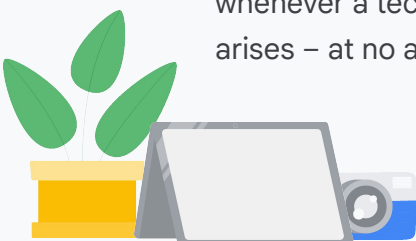

→ **Access to 24/7 support**

Get ChromeOS troubleshooting assistance by calling Google whenever a technical issue arises – at no additional cost.
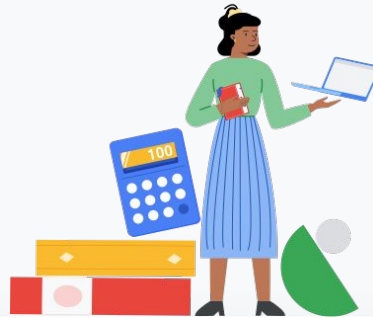

> Before [Chrome Education Upgrade], we used [another platform] to share computers. But we got feedback from the network team that said they had difficulties with the tool and they had a hard time getting it to work."

# Elevate student experiences with Chromebooks in your classrooms

Secure student testing with kiosk mode

Enable kiosk mode to turn Chromebooks into a secure platform for student testing, so students can focus and do their best in a reliable and distraction-free environment. During an exam, you can disable students' access to the web and external storage, and prevent them from taking screenshots and printing.

Encourage creativity with Screencast

Use the built-in Screencast app on Chromebooks to let students express their ideas for a presentation or report by narrating, recording, editing, and animating their own videos.
